

Chairs

Prof. Robert Vichnevetsky Rutgers University - USA

President of IMACS and Honorary Chair of the Congress

Prof. Michel Deville EPFL - Switzerland

General Chair of the Congress

Congress national committee

Dr. Alain Clappier Prof. Robert Owens

Prof. Giovanni Coray Prof. Leopold Pflug

Prof. Michel Deville Prof. Alfio Quarteroni

Dr. Dimitris Kiritsis Prof. Michel Rappaz

Prof. Thomas Liebling Prof. Laurent Villard

Prof. John Maddocks

Congress international committee

R. Beauwens Université Libre de Bruxelles - Belgium

P. Borne Ecole Centrale de Lille - France

C. Brezinski Université des Sciences et

Technologies de Lille - France

J. Butcher University of Auckland - New Zealand

J. Dongarra University of Tennessee, Knoxville - USA

J. Flaherty Rensselaer Polytechnic Institute - USA

A. Frommer University of Wuppertal - Germany

A. Iserles University of Cambridge - UK

A. Jakeman Australian National University - Australia

N. Kuznetsov Institute for Problems of Information Transmission,
Moscow - Russia

J. Rice Purdue University - USA

R. Russell Simon Fraser University - Canada

S. Steinberg University of New Mexico - USA

H. Stetter Vienna University of Technology - Austria

A. Sydow GMD First - Germany

S. Tzafestas National Technical University of Athens - Greece

P. van der Houwen National Research Institute for Mathematics and
Computer Science - The Netherlands

R. Vichnevetsky Rutgers University - USA

J. Vignes Université Pierre et Marie Curie - France

Invited keynote speakers

C. Benham Mt. Sinai School of Medicine NY - USA

R. Caflisch UCLA - USA

J. Dongarra University of Tennessee, Knoxville - USA

H. Föllmer Humboldt University - Germany

P.-L. Lions Université de Paris Dauphine and CNRS - France

J. Ockendon University of Oxford - UK

G. Strang MIT - USA

A. Stuart Stanford University - USA

H. van der Vorst Utrecht University - The Netherlands

G. Wanner Université de Genève - Switzerland

16th IMACS WORLD CONGRESS 2000

on Scientific Computation, Applied Mathematics and Simulation

$$\rho \left[\frac{\partial \vec{v}}{\partial t} + (\vec{v} \cdot \nabla) \vec{v} \right] = -\nabla p + \mu \nabla^2 \vec{v} + \rho \vec{f}$$

$$\rho \left[\frac{\partial \vec{v}}{\partial t} + (\vec{v} \cdot \nabla) \vec{v} \right] = -\nabla p + \rho \vec{f}$$

$$\mu + \rho g z + \rho \frac{v^2}{2} = C$$

COMPUTATIONAL METHODS IN FINANCIAL ENGINEERING

MINISYMPOSIUM ORGANISERS
