CPD Overview

The RIBA is a key source of information on architecture and related subjects. From up-to-date material on all aspects of design and construction, through to international architectural history.

Available CPD Material (10)

Inclusive Design: Going Beyond Regulatory Accessibility Standards

This seminar will give an insight into diverse user needs and why designers must look beyond mandatory, baseline accessibility standards in order to create built environments which are truly fit for purpose. Using real life situations, the session will explore why this matters and why it doesn't have to mean the end of a stylish building.

Material type: Seminar

RIBA Core Curriculum: **Access for all: universal/inclusive design**
Designing and building it: design, construction, technology and engineering

Knowledge level: Detailed Knowledge

Listed Building Consent: When Do You Need it and How Do You Get It?

This seminar will give an overview of which buildings and works require listed building consent, as well as a procedure for working towards consent, referencing the RIBA Plan of Work 2013.

Material type: Seminar
RIBA Core Curriculum: **Compliance: legal, regulatory and statutory frameworks and processes**
Context: the historic environment and its setting
Knowledge level: Detailed Knowledge

A Planning Update: Planning Policy Issues for Practitioners

The planning system in England can be a complex, ever-changing and frustrating process. Knowing some tricks of the trade is crucial to navigating this minefield. This seminar will bring you up to date with key policy and legislative changes and provide an insight into how to cut out some of the bureaucracy.

Material type: Seminar
RIBA Core Curriculum: **Compliance: legal, regulatory and statutory frameworks and processes**
Where people live: communities, urban + rural design and the planning process
Knowledge level: Detailed Knowledge

Briefing and Evaluation: How to Give Clients What They Want by Learning from Projects

Evidence shows that many buildings are not performing as intended, leading to a 'performance gap'. Working towards agreed outcomes and avoiding common pitfalls can increase client satisfaction and reduce this gap. This seminar will explain how better briefing delivery and evaluation can help give clients what they want, and how you can learn from projects after handover.

Material type: Seminar
RIBA Core Curriculum: **External management: clients, users and delivery of services**
Knowledge level: Detailed Knowledge

A Common Sense Guide to Contract Administration and Contracts for Domestic and Minor Works

This seminar will describe the latest RIBA and JCT contracts for domestic and minor work, their benefits and differences and will explore useful tips on selecting the most suitable one for any project. The session will provide a useful insight into issues in every day contract administration.

Material type: Seminar
RIBA Core Curriculum: **Internal management: professionalism, practice, business + management**
Procurement and contracts
Knowledge level: Detailed Knowledge

An Essential Guide to Public Procurement: Better Prospects and More Opportunities

Using the 'Ten Principles for Procuring Better Outcomes', this seminar demonstrate what you need to know to optimise your opportunities through public procurement. The session will provide an overview of current legal and regulatory context and equip you with strategies and tactics for procuring better outcomes, regardless of practice size.

Material type: Seminar
 RIBA Core Curriculum: **Internal management: professionalism, practice, business + management**
Procurement and contracts
 Knowledge level: Detailed Knowledge

Green House: How to Design a Truly Resilient Home Beyond Solar Panels

Despite the Government's recent removal of many sustainable building standards, there is a greater need than ever to construct low impact, resilient building, in order to minimise their effect on the climate change. This seminar will demonstrate how to design future proof homes in a truly holistic and sustainable way.

Material type: Seminar
 RIBA Core Curriculum: **Climate: sustainable architecture**
Designing and building it: design, construction, technology and engineering
 Knowledge level: Detailed Knowledge

CDM 2015: Is Your Project in Line with the Current Regulations?

The application of CDM is more of an art than a box ticking exercise. As an expert in your field you must know your business when it comes to CDM 2015. This seminar will focus on roles and responsibilities and how to ensure your project is compliant with Health and Safety Regulations, so far as reasonably practicable.

Material type: Seminar
 RIBA Core Curriculum: **Being safe: health and safety**
Compliance: legal, regulatory and statutory frameworks and processes
 Knowledge level: Detailed Knowledge

Financial Management: How to Run a Profitable Business

Exceeding clients' expectations is a key contributor to a successful practice, but it can often lead to architects working 'in' the business as opposed to 'on' the business. This seminar will focus on financial management and the key considerations architects should be aware of when looking to run a successful and profitable practice.

Material type: Seminar
 RIBA Core Curriculum: **Internal management: professionalism, practice, business + management**
 Knowledge level: Detailed Knowledge

Fees: How to Best Calculate, Negotiate and Monitor

Good design is the goal of most architects, but delivering projects on programme and to budget requires time and effort. An understanding of the different appointment scenarios is essential for providing a viable and competitive fee. This seminar will explain how to provide a professional service without losing money in the complex world of building procurement.

Material type:	Seminar
RIBA Core Curriculum:	Internal management: professionalism, practice, business + management
Knowledge level:	Detailed Knowledge
